Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The closest prior art is Huang (US 4,883,886) and Barini et al. (US 6,562,904), each of which disclose a two-stage process for reacting a polyolefin (such as polyisobutylene) with an unsaturated carboxylic reagent (such as maleic anhydride) for the making of a fuel or lubricating oil additive. While each reference process discloses a first and second contacting of maleic anhydride with PIB at elevated temperature, neither discloses reducing the temperature of the second contacting to a temperature at which the reaction rate is no more than 40% of the peak reaction rate. No motivation can be found for modifying either reference to reduce the temperature of the second contacting in the manner required in the claims.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberto Rábago whose telephone number is (571) 272-1109. The examiner can normally be reached on Monday - Friday from 8:30 am - 4:00 pm.
